1. A Fairy Tale

Mermaids, fairies, magic, and talking animals are what come to mind when thinking of Fairy Tales. These tales are so much more than just stories. Originating in France, this is the story of Belle, a beautiful peasant girl who took the place of her father, when he was taken prisoner by a fierce beast. While things were uncomfortable and frightening for Belle at first, she soon grew fond of the beast, as he had done nothing but treat her with kindness. When Belle found out her father was sick, she begged the beast to let her go to him and promised to return, but she was held up by the evil Gaston, a famous hunter from the village who wanted to marry Belle. When the village found out about the beast, they vowed to kill him and stormed his castle. Though he nearly died, he was saved and turned into a handsome prince because of Belle's love for him. It turns out that he had been a prince who, along with his entire household, was cursed by a witch because he did not treat her with kindness.
