Academic Program and Course Description Guide

2024

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

<u>Academic Program Description</u>: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

<u>Course Description</u>: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

<u>Curriculum Structure:</u> All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

<u>Learning Outcomes:</u> A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

<u>Teaching and learning strategies:</u> They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

1. Program Vision

The College of Administration and Economics at the University of Basra aspires to be among the ranks of distinguished colleges globally in the economic, administrative, accounting, statistical and financial fields and to be distinguished scientifically and administratively and in the quality of service it provides to society and stakeholders at the national, Arab and international levels and to be committed to the academic professional culture among the ranks of academics and employees. In addition to pursuing development prospects in the university academic aspects (education, research, and service).

2. Program Mission

The College of Administration and Economics at the University of Basra seeks to provide the best service to the community and parties that exchange interests and benefits with it, and with the university through accurate diagnosis of their current and future needs and achieving an effective and efficient response to these needs and expectations by ensuring the quality of all university operations and practices (educational, research, advisory, and administrative) according to the following:

- 1. The best investment of the college's resources and energies through effective commitment to implementing the provisions of the quality assurance and academic accreditation system.
- 2. Improving the performance of human resources (academic and functional) through participation in specialized and advanced teaching and development courses inside and outside the country.
- 3. 3. Preparing plans and programs that include using the resources (material, financial, and technical) available to the college to improve the college's overall performance.

4. Program Objectives

The College of Administration and Economics at the University of Basra seeks to provide the best service to the community and parties that exchange interests and benefits with it, and with the university through accurate diagnosis of their current and future needs and achieving an effective and efficient response to these needs and expectations by ensuring the quality of all university operations and practices (educational, research, advisory, and administrative) according to the following:

- 1. The best investment of the college's resources and energies through effective commitment to implementing the provisions of the quality assurance and academic accreditation system.
- 2. Improving the performance of human resources (academic and functional) through participation in specialized and advanced teaching and development courses inside and outside the country
- 3. Preparing plans and programs that include using the resources (material, financial, and technical) available to the college to improve the college's overall performance.

8. Program Description									
Year/Level	Course Code	Course Name	Credit 1	Hours					
			theoretical	practical					
2023-2024/ The first stage	The first stage	Basic of Statistics 1	2	1					

9. Expected learning outcomes of the program

knowledge

The course aims to build the analytical personality of financial and banking systems for students of the Department of Financial Sciences by introducing them to the most important methods and methods for selecting a statistical sample according to a number of statistical conditions and characteristics, how to estimate the parameters of each sample, and how to estimate the sample size, which contributes to laying a sound foundation for the student to be able to Conducting any field work towards scientific research

Skills

The ability to construct and analyze financial problems and analyze financial markets and economic phenomena with a financial and banking dimension by adopting available statistical methods.

Ethics

^{*} This can include notes whether the course is basic or optional.

10. Teaching and Learning Strategies

- 1. Adopting the theoretical basis and providing the student with all the vocabulary of the curriculum.
- 2. Adopting the discussion method by presenting some ideas during the lecture so that it develops the student's ability to understand the topic directly.
- 3. Providing applied examples through digital examples that simulate the topics covered in theory so that the student's knowledge picture is complete in theory and practice.
- 4. Adopting the immediate examination method (written and analytical) to develop the spirit of competition among students.
- 5. Adopting the assignment method after completing any topic within the specified academic vocabulary

11. Evaluation methods

Ability to model and analyze using statistical programs and higher programming languages

12.Faculty							
Faculty Members							
Academic Rank	Specializa	ation	Special Requirements/Skills (if applicable)		Number of the teaching staff		
	General	Special			Staff	Lecturer	

Professional Development

Mentoring new faculty members

Briefly describes the process used to mentor new, visiting, full-time, and part-time faculty at the institution and department level.

Professional development of faculty members

Briefly describe the academic and professional development plan and arrangements for faculty such as teaching and learning strategies, assessment of learning outcomes, professional development, etc.

13. Acceptance Criterion

(Setting regulations related to enrollment in the college or institute, whether central admission or others)

14. The most important sources of information about the program

State briefly the sources of information about the program.

Course Description Form

1. Course Name: Basic of Statistics 1

An introduction to statistics, explaining its types and methods of collecting data
Types of samples and methods of selecting them
Graphical and tabular display of data

Processing frequency distribution tables using some statistical measures

- 2. Course Code:
- 3. Semester / Year:

2023-2024

4. Description Preparation Date:

22-2-2024

5. Available Attendance Forms:

Semesters (Semester 1

6. Number of Credit Hours (Total) / Number of Units (Total)

30 and 4 unite

7. Course administrator's name (mention all, if more than one name)

Name: L. Ahmed Husham Mohammed Albasri

Email: ahmed.albasrai@uobasrah.edu.iq

8. Course Objectives

- Building students' cognitive abilities in the concept of statistics
- Enabling students to use statistical tools and applied methods in dealing with financial and banking phenomena
- 9. Teaching and Learning Strategies
- 1. Presenting the concepts, methods and areas of their application within the financial, banking and general reality.
- 2. Brainstorming education strategy.
- 3. Teaching strategy by adopting direct discussion in the classroom.

4. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	3	• Adopting the discussion method by presenting some ideas during the lecture so that it develops the	A historical overview of the development of the concept of statistics, its types and areas of application	In classrooms	Daily exams, direct discussion questions and monthly exams
2	3	student's ability to	The nature of statistical data, the		

		understand the topic directly. •Using applied examples that simulate	method of data collection, and the sources of data collection	
3	3	the topics covered theoretically so that the student's knowledge	Types of statistical sampling and all sampling methods	
4	3	picture is complete theoretically and	Simple random sampling	
5	3	practically. •Adopting the	Stratified random sampling	
6	3	immediate examination method (written and analytical)	Regular stylistic inspection and multistage inspection	
7	3	to develop the spirit of competition among students.	Non-random inspections, quota inspections and intentional inspections	
8	3		Graphical display of data, bar graphs, statistical circle, graph line and statistical rectangle.	
9	3	-	Practical examples	
10	3		Tabular display, and how to display simple frequency distribution tables	
11	3		Calculating true boundaries of classes, calculating class centers, clustered frequencies	
12	3		Ascending clustered iteration	
13	3		Downward clustering frequency, upward and downward clustering histogram	
14	3	1	Practical examples	
15	3		Final exam for the semester	

5. Course Evaluation

25 marks for the first month's exam, including (20) marks for the monthly exam and (5) marks for daily activities

25 marks for the second month's exam, including (20) marks for the monthly exam and (5) marks for daily activities.

Final pursuit score (50) marks
